## Ollama

model runtime

## FastAPI

backend

## SQLite

history

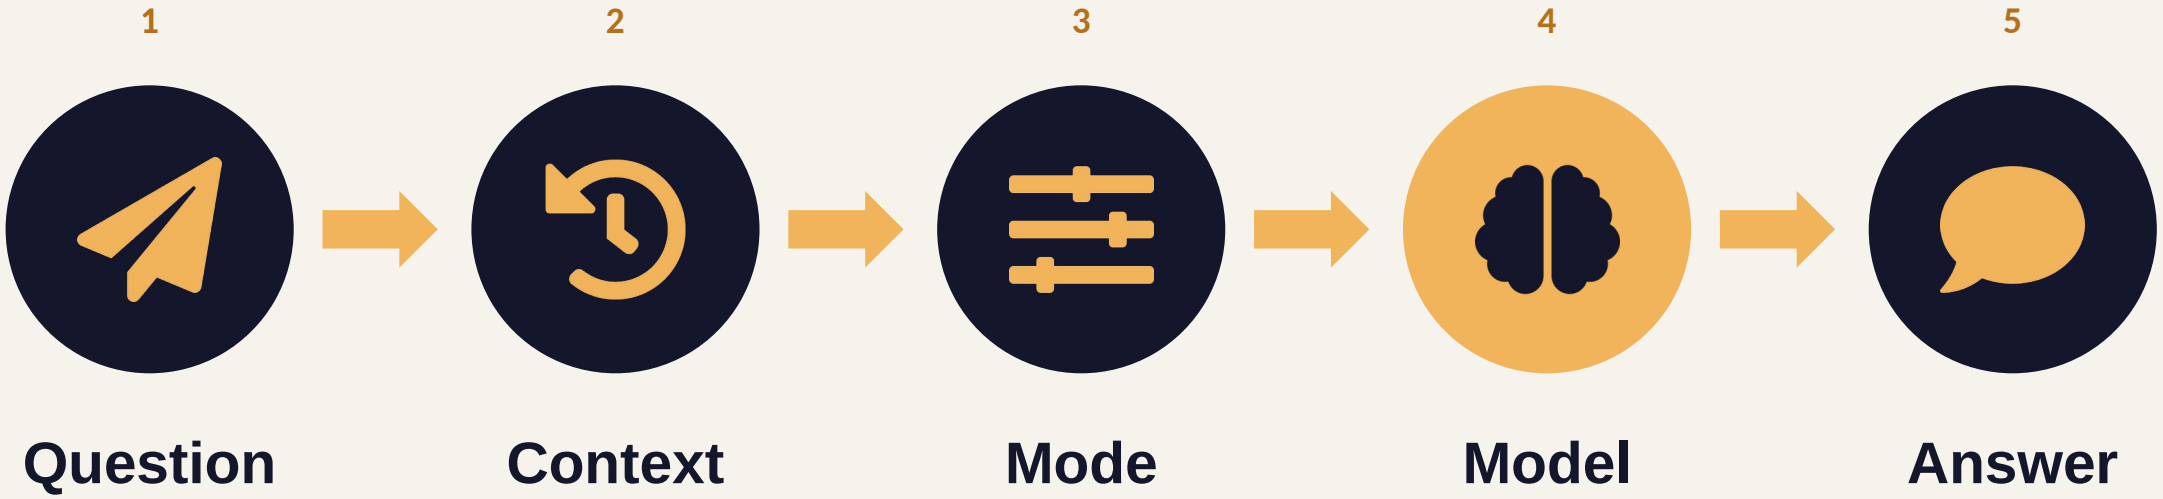

## HTML · CSS · JS

interface

REQUEST FLOW

# The path of one message

last 20 messages · mode prompt · qwen3 or qwen3-vl

MODEL SETTINGS

# Temperature by mode

| Chat | Write | Translate |
| --- | --- | --- |
| 0.4 | 0.7 | 0.1 |
| precise | lively | exact |

`think` — reason before answering

DATA STORAGE

# Two tables in SQLite

**chats**

- id
- title
- mode
- created_at

1:N

**messages**

- id
- chat_id → chats
- role
- content
- images
- created_at

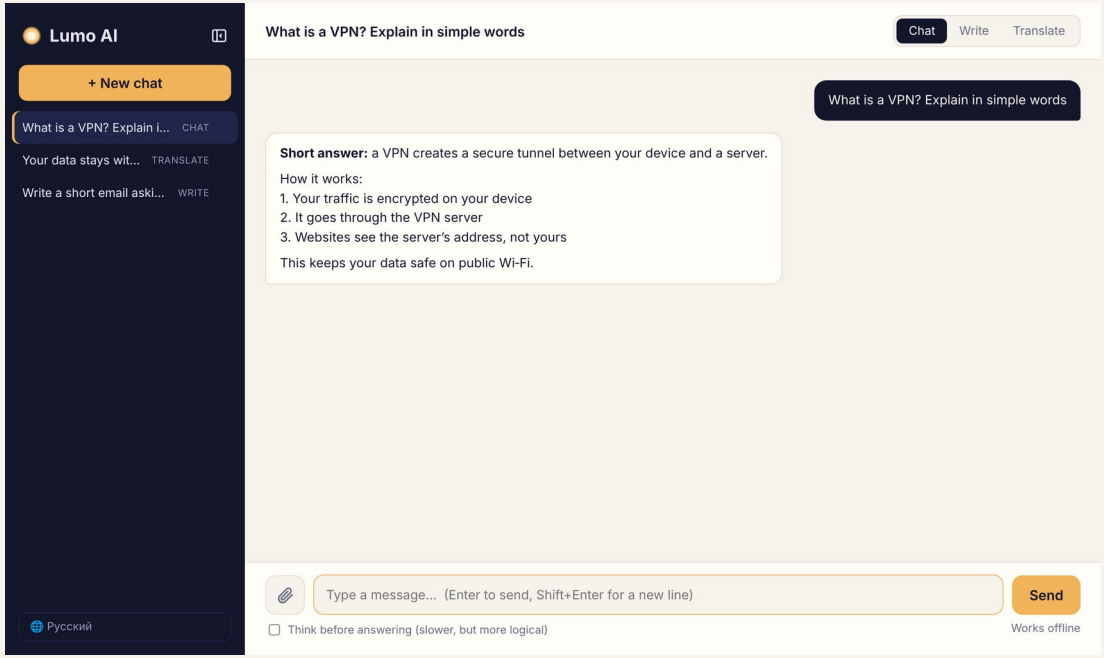

REST API

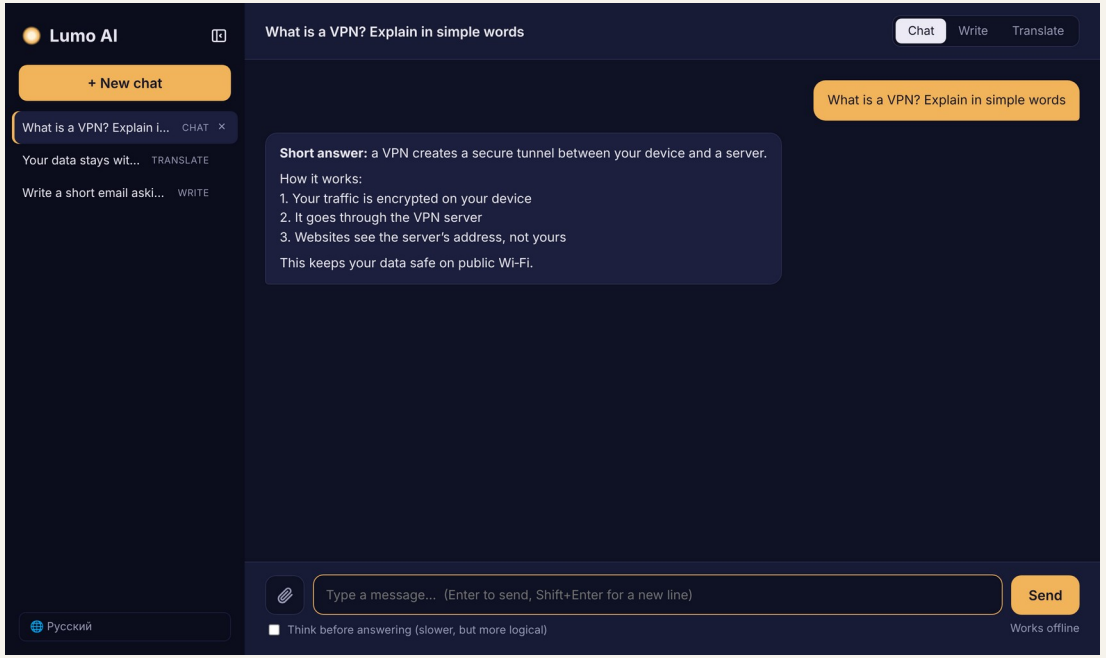

# 7 endpoints

| | |
|---|---|
| POST | /ask |
| POST | /chats/{id}/ask |
| POST | /chats |
| PATCH | /chats/{id} |
| GET | /chats |
| DELETE | /chats/{id} |
| GET | /chats/{id} |
|  | /docs |

INTERFACE

# Light and dark theme

REQUIREMENTS

# What it runs on

**16 GB**

RAM

**11 GB**

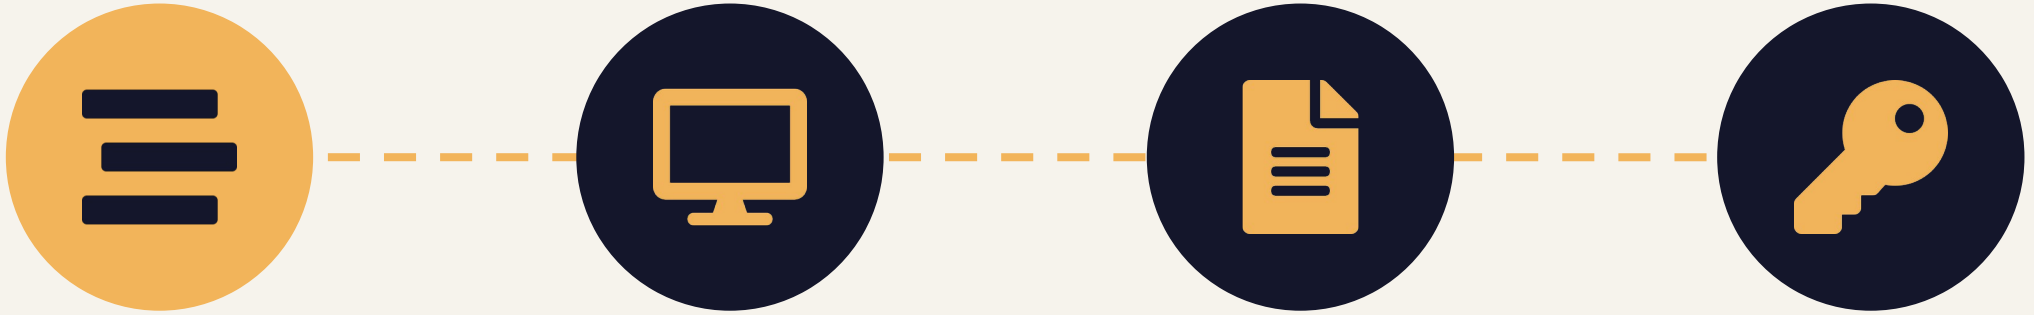

on disk
